

# BLAGOVEST DAMYANOV

I have been programming for 5 years. As a programmer, I am responsible and motivated to find solutions to every problem. I can work independently or in a team, with collaboration and communication being important to me. Additionally, if you are looking for a young and motivated programmer who is willing to grow and help with the development of the company, I am that person.

## WORK EXPERIENCE

### MentorMate Bulgaria September 2021 - May 2023

Through my school, I have secured a two-year internship at MentorMate. At MentorMate, we worked on a real-world project with a team of 7 people, including a BA, a Backend Developer, 2 Frontend Developers, 2 QA, and a Team Lead. My role was to work on the backend part of the project. Together with the Team Lead, we designed and implemented the database schema using Entity Framework (Code First). Additionally, I worked on creating endpoints, services, and repositories using the Repository Pattern model. This project taught me how to structure my code better, give exact names to methods, endpoints, etc., and improve my teamwork skills. Technologies used: MS SQL, EF(Code First), Asp.Net, React, Bootstrap

## EDUCATION

### PGEE "M.V.LOMONOSOV" SEPTEMBER 2018 - MAY 2023

I am a 12th grade student studying Applied Programming. Additionally, I am supplementing my knowledge at the private university Softuni. I mainly focus on C#. I have completed courses and obtained certificates for C# Fundamentals, C# Advanced, C# OOP, SQL, Entity Framework, and Web ASP. I enjoy working primarily on the backend portion of projects. For backend development, I prefer to use the C# programming language.

## LANGUAGES

Bulgarian - C2  
Native or Bilingual Proficiency

English B1  
Limited Working Proficiency

German A1  
Elementary Proficiency

## SKILLS

ASP.NET

MS SQL

Entity Framework

API

HTTP

OOP

MVC

JS

HTML

LIT-HTML

CSS

SCRUM

Windows Forms

Unit Testing

Microsoft Visual Studio

RESTful API
